

Native EUPP / DWD temperature validation

Berus station, 2017-2018 initializations | 14,600 future opportunities | 14,430 settled

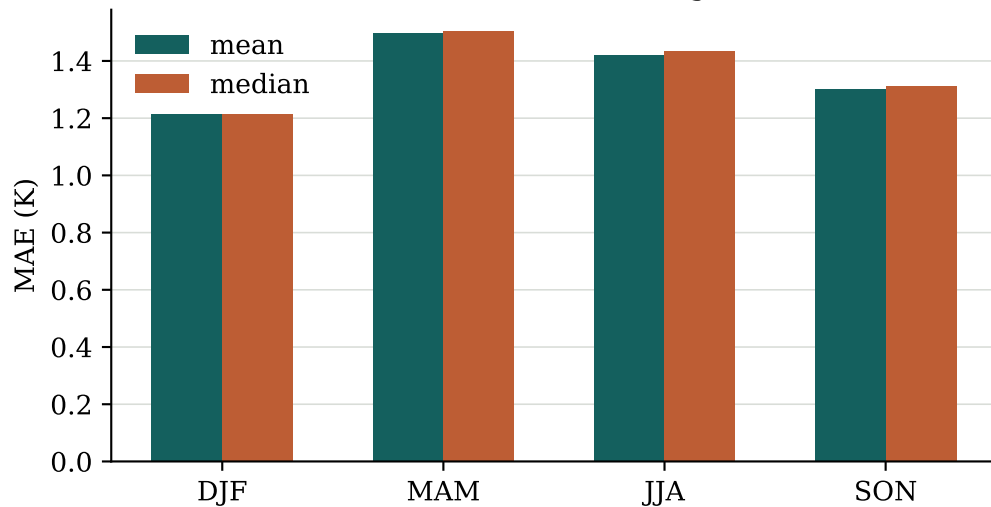

A. Point-temperature error

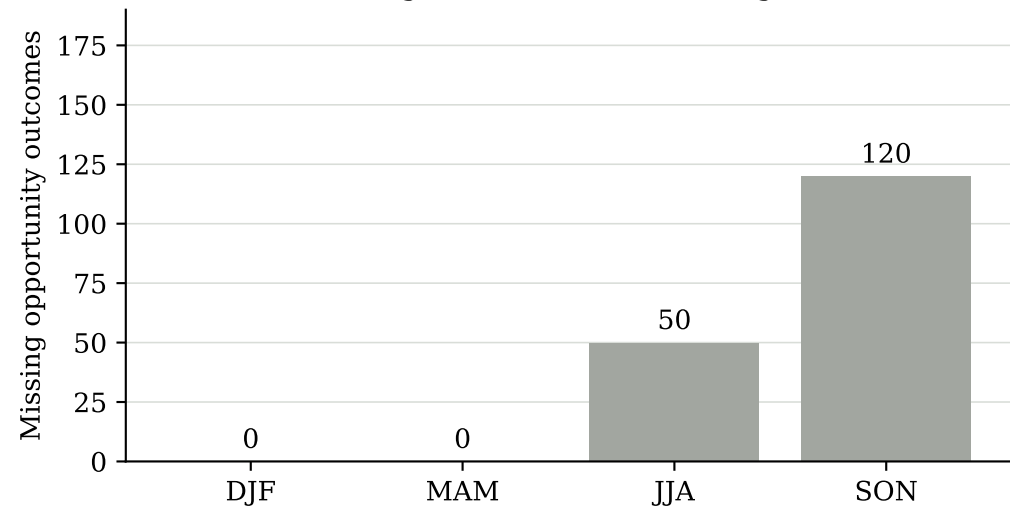

B. Raw ensemble event probabilities

C. Seasonal coverage

D. Missing outcomes remain registered

Repeated leads and adjacent hours are dependent. No confidence intervals or independent confirmation.
Hot/cold point targets do not establish heatwaves, cold waves, or calibrated probability skill.
